**Attachments:** Limetree briefing document\_9-11-18.docx

Dear Limetree Bay Workgroup,

Please see below our first weekly update to senior leaders on Limetree. Unfortunately we weren't able to vet this one with you before sending. Our plan going forward is to circulate a draft update by noon each Thursday, requesting comments or corrections by first thing Friday, and hitting "send" by Friday noon. We'll adjust the approach and expectations as needed and welcome your suggestions on this and on the collaboration overall. I am attaching the Region 2 update that Rob included with the update.

Please let me know if you see inaccuracies in this week's update, including if you think it warrants correction today or can just be updated in next week's report. Please also note that Henry, who issued the directive, is pleased with the information and the effort overall, which is to everyone's credit.

Thank you and have a great weekend –

All the best,  
Tom

This is perfect Rob, both format and content. Thank you so much.

Henry

**Subject:** Limetree Bay Terminal (LBT) Status Update 9/14/2018

Henry,

My first recurring weekly status update is provided below. I will aim for Fridays, unless you or Andrew have a preference/need for a different frequency and/or different point in the week. I will also end each update with a proposed summary that you can forward to AW at your discretion so that he is prepared to respond quickly to a no-notice inquiry. I'll keep future updates shorter (3-4 bulleted highlights or so), but please advise if you'd prefer a format other than what I have provided today. There is also a lot of detail behind each piece, so we are prepared to brief you in person with little notice if you'd like a deeper dive or have questions at any point. R2, OECA and OAR staff have invested a significant amount of time digging into the details; which certainly made getting up to speed much easier. I've copied Bill, Patrick, David, and Pete out of courtesy and appreciation....which I'd ask make it back down to their staff (and if any of you would like to be dropped from future updates, please let me know offline).

I've also attached R2's more recent issue paper/fact sheet for reference.

Thanks, Rob

**Subject:** Limetree

Pete:

Acting Administrator Wheeler and I have asked the Office of Policy to engage their Office of Federal Activities to lead in the coordination of the Limetree matter. The Director, Rob Tomiak, has agreed to serve as EPA's project manager who will be the primary point of contact for Limetree in helping to connect them with the federal programs and offices they must involve to resume operations. Please inform your team to fully cooperate with Rob in these efforts.

If you have any questions, please let me know.

Thank you.

Henry
